

SEAN TYLER ATWELL

204 N. Ryan St. Unit 2, Auburn, AL 36830, (334) 796-8921, sta0003@auburn.edu

July 15, 2015

To whom it may concern,

I have been looking for a job in the Auburn area, and I found this listing on the AUEmployment website. Looking through the job description, I believe I would be a good fit for the position. I have experience with:

- C#
- Javascript
- HTML
- CSS
- XML
- ASP.NET
- MVC
- Angular
- MSSQL and MySQL
- SQL Server Management Studio
- Visual Studio

I have worked for the University in the past, both as a Co-op and as a TES employee, and have developed for several of the projects that the User Services Desktop Support team uses.

I have a strong backing in full stack web development, having done everything from purely front end projects to managing Web and SQL servers.

I have been developing my communication skills over the past several years while working as a team lead at TgL Communications. Part of my job there was to meet with clients, many of whom spoke English as a second language, and develop project specifications for the applications we developed. Through this experience I have learned the importance of understanding a project before it is started, and the importance of working with the workers on the ground so that you can see the actual process you are developing a system to augment or replace.

Thank you for your time and consideration. I look forward to hearing from you.

Best Regards,

Sean Tyler Atwell
